Dr. Dolittle's Corner

Have you ever noticed your dog carefully when you walk it on the street? When your dog smells the ground, walks in circles, keeps looking at you in the eye suddenly, it's time for poop.

Do you notice every time before your dog poops, it does the same things---smelling, walking in circles, and looking at you? Why? By looking at dogs' close cousins, wolves, we can find one possible answer. In the wild, wolves usually smell around to decide a good place to poop. Then they walk in circles to make sure there are no other animals around. After that, they start to do their business. During this time, wolves must be very careful because they can be easily attacked, so they keep their eyes on each other by watching each other's back.

- Mary L.** –Dec 6, 2016 7:28 a.m.
Probably not to my dog. It takes a long time for my dog to find a place to poop, and if he catches me looking at him, he would start all over again.

When my dog looked at me and pooped, I thought it was trying to tell me not to come close. So I usually turned around and waited. I won't do that again.
