### 五、閱讀測驗，共 10 題，每題 1 分，共 10 分。

Below are four people's responses to a question.

Jamie

No, not at all. I wanted a job that was out in the sun, around nature, and away from too many people. However, I'm stuck inside an office that has no windows, and I'm working for a boss that I can't stand.

Helen

Of course, my job is perfect. Ever since I could remember, I've dreamed about making pictures that people not only want to look at but also buy. Now, I'm living that dream, and it's absolutely wonderful.

Sampson

I did once, but I let it slip through my fingers when I did something that I couldn't take back. I messed up really badly, and I don't know if I'll ever have a job that made me that happy ever again.

Carly

I think so, but I'm not 100% sure. One minute, I want something that I can do to help people, and the next minute, I'm dying for a job that I can get rich. To be honest, I don't know if this job is the one that I truly want.

It is easy to see that global warming is getting worse. The Earth has been terribly hurt by many human activities, such as wasting limited natural resources. Scientists have been working very hard to come up with ways to save more resources and protect the environment. In 2011, Horace Luke and Matt Taylor invented the first and the only smart scooter in the world. Their Gogoro runs on electricity, consuming less energy and reducing air pollution. Its look and design have caught people's eye and made it popular. Although it's not very cheap, many people buy it for the difference it makes. For those who are looking for a scooter and want to be eco-friendly, the Gogoro is a great choice. It is win-win for everyone and the Earth.
